

I would like the FCC to know that I support XM radio, and wish to have my traffic and weather available to me on demand. I believe it is my choice to decide what I hear, especially since I am PAYING for this service, and it is not something free over-the-air. I pay for it, and I should control what I hear, not the NAB. I ask that you reject NAB's petition 04-160. In addition, I ask that the FCC allow any future petitions of XM to allow video over XM as well. Thank you.
